Envirogen, Inc. Canton, Massachusetts

Environmental Scientist

SC&A, Inc.
Lowell, Massachusetts

Samantha Dolynchuk is Chief of Staff for UCOR. In this role, she works to create synergy across the executive leadership team, the Department of Energy (DOE), and other key stakeholders.

Samantha leads the business assurance, communications, information technology, and government and stakeholder affairs teams. She oversees mission-critical functions like strategic planning, risk management, cybersecurity, and workforce development.

Under the previous East Tennessee Technology Park (ETTP) contract, Samantha was the senior project manager for the Y-12 National Security Complex (Y-12) and Oak Ridge National Laboratory (ORNL) deactivation and demolition projects with annual budgets of approximately \$90 million. She was instrumental in adding approximately \$500 million to the baseline scope to maintain momentum in UCOR's cleanup work. This additional funding supported transitioning workers to ORNL and Y-12, as well as reaching FY 2021 end states.

Samantha led a team of project managers through the successful transition of workers from ETTP to Y-12 and ORNL, which involved accelerating infrastructure mobilization. As a result, UCOR successfully demolished the Biology Complex at Y-12 in 2021. This demolition and other end-state achievements at ORNL and Y-12 are focused on reducing risk and providing land for continued science and national security missions.

Samantha has 24 years of experience managing environmental cleanup and remediation projects for the Department of Defense, DOE, Tennessee Valley Authority, and commercial clients. She is experienced in cost-plus-fixed-fee, firm-fixed-price, and guaranteed-firm-fixed-price contracts. Her diverse background has proven effective in managing cross-functional and matrixed teams and in proactively engaging senior leadership, clients, and stakeholders.

Samantha is a PMI Project Management Professional. She has served on the boards of directors for the East Tennessee Project Management Institute and the United Way of Anderson County. For the last 10 years, Samantha has chaired a United Way of Anderson County Funds Distribution Panel.

Samantha received a Bachelor of Science degree in environmental science from the University of Denver.
